Red Hat® Linux® ENTERPRISE EDITION optimized for Oracle8*i*™

Red Hat®, Inc. and Oracle® Corporation present the world's first integrated database on Linux for e-business and enterprise applications.

Today's IT professional demands reliable, high availability solutions that can support exponential and often unpredictable growth in user demand. In addition, traditional proprietary platforms are proving too costly in resource overhead and too slow in updates and improvements to be effective in today's environment.

Red Hat, the leader in open source solutions, and Oracle, the world's leading supplier of software for information management, have partnered to create a robust, tightly integrated product set, ideally suited for department-level and mid-market organizations deploying e-business, ERP, CRM, and other data-centric initiatives. Oracle's distinguished leadership in database management and e-business combines proven, enterprise-class capability with the dynamic open source Red Hat Linux environment.

The Red Hat Linux Enterprise Edition optimized for Oracle8*i* now provides a choice — a stable yet innovative platform with leading-edge capabilities — built on reliable, proven technology that stands up to strenuous user demands. Oracle further enhances the platform through its strict certification process — rigorously testing all Red Hat Linux code before certification.

Red Hat and Oracle work closely together at many levels — from development and engineering to sales and marketing. Doug Kennedy, Red Hat's Alliances Vice President, Intel Technologies Division, summarizes the partnership's value:

"Oracle and Red Hat have committed to Red Hat Linux as an enterprise-ready operating environment for Oracle's powerful Internet and enterprise data management solutions. Together, we have created an enterprise-ready infrastructure with the reliability, scalability, security, and robustness required for e-business and other enterprise applications."

Red Hat's Linux Enterprise Edition optimized for Oracle8*i* brings enterprise-level benefits to small and mid-sized organizations and departments of Fortune 1000 companies:

- The scalability and robustness of the industry-leading Oracle8*i* relational database management system.
- The flexibility of the award-winning open source Linux environment from Red Hat, the definitive Linux market leader.
- A tightly integrated product pairing optimized for e-business — the Red Hat Linux Enterprise Edition optimized for Oracle8*i* solution integrates key e-business features such as the Java Runtime Environment (JRE), Motif 2.1, clustered server support, large facilities and file systems, necessary for a successful e-business environment.
- Maximized hardware and software investment— Red Hat Linux Enterprise Edition optimized for Oracle8*i* runs on Intel-compatible computers, preserving companies' existing investment in industry-standard desktop and server systems, and ensuring a cost-effective option as new hardware is added.
- Global scope — the Red Hat and Oracle solution stands up to the needs of global organizations. Both Red Hat and Oracle provide world-class service through flexible support packages provided by regional support centers worldwide.

The Red Hat Linux Enterprise Edition optimized for Oracle8*i* solution provides a logical growth path for companies with expanding computing requirements. Linux can be deployed quickly, easily, and at low cost on Intel-compatible computers. Red Hat Enterprise Edition and Oracle8*i* can easily scale to meet expanding computing needs, from growth in internal users to peaks in Web site traffic.

A Stable, Secure Platform

Linux is the fastest-growing operating system in existence, outpacing Windows™, Solaris™, and other server-based systems through 1999. There are an estimated 12 to 15 million users to date, and independent research proves their satisfaction levels are high.

The unique open source community model garners fast and thorough feedback on all changes to Linux. Thousands of Linux developers promptly exercise new code for bugs, security holes, and quality of new features and functionality. Consequently, improvements are available on a far more rapid and complete basis than with closed or proprietary operating systems. And this collective effort produces a highly secure operating environment. Red Hat has enhanced this model to include formalized product development, code maintenance, and worldwide support.

World-Class Support

Red Hat offers top quality support for customers around the globe. Our broad network of channel partners are available to provide and install software, closely backed by Red Hat's support team.

A one year technical support package (per system, standard hours) is included with every copy of Red Hat Linux Enterprise Edition optimized for Oracle8*i*. Other support options include on-site consulting, developer support, training and certification. Our service centers around the world ensure that you receive quality resources you need to meet your localized requirements.
